PROFILE

Passionate and detail-oriented Cyber Security enthusiast with strong analytical and problem-solving skills. Empathic listener with excellent communication, organizational, and management abilities. Dedicated to making a positive impact, eager to continuously learn, and approaching challenges with an entrepreneurial mindset.

Beyond my tech and legal skills in Cyber Security, I'm fascinated by the human side of it. I enjoy unravelling what motivates people, understanding their actions, and crafting solutions that meet genuine needs. I find joy in roles that allow me to integrate my tech expertise with this human perspective, creating solutions that truly make a difference.

in Cyber Security

EXPERIENCE

SOC Analyst - Openbaar Ministerie (and Senior Advisor Business Operations)

Analyst in the Security Operations Center (SOC) of the Public Prosecutor's Office / District Attorney of the Netherlands.

Aug. 2024 -
Present

As a SOC Analyst, I handle the essentials—monitoring, investigating, and responding to security incidents. On top of that, I dive into tasks typically owned by SOC Engineers, like writing and fine-tuning detection rules. I also take on more strategic roles usually associated with Security Consultants or Architects, such as assessing the SOC's maturity and driving initiatives to elevate its effectiveness and resilience.

Northwave Cybersecurity

Nov. 2023 -
Aug. 2024

- SOC Analyst | Security Specialist** Apr. 2023 – Aug. 2024
 Picking up alarms triggered by Cyber Security incidents and investigating them.
- Internship | Blue Team, SOC** Nov. 2023 - Mar. 2024
 This 5-month Cyber Security internship was part of my master's program at Radboud University and Eindhoven University of Technology. I worked with use cases and alarm data in the SOC.

Administrator - HackFlag

Owner and administrator of a Dutch ethical hackers community (with over 8,000 registered members and 100,000 posts). Founded in June 2012 by me. Website: <https://hackflag.org>

Jul. 2012 -
Jul. 2022

Goals:

- build a platform where Dutch and Belgian hackers can exchange knowledge about hacking and cyber security
- assure users become ethical hackers and refrain from unlawful activities by educating them about ethics and (tech) laws.

Student assistant – Leiden University

Sep.2014 -
Jan. 2015

Some information has been omitted in this online version

- Aug. 2008 - Aug. 2014** **Owner – Ellusoft**
When I was in high school, I supported people in my city solving their computer problems during the weekends.
More information: david.ooo/ellusoft
- Jul. 2013 - Dec. 2013** **Co-Founder and Board Member, Head of Communications – VaDinci**
I founded a residents association together with four others.
Goal: to represent and defend the interests of approximately 70 residents in a student flat.
- Jul. 2012 - Dec. 2013** **Facility Manager - STW Nederland**
I was part of the facility management of a student house that consisted of approximately 65 apartments.

EDUCATION

TU/e

Master Cyber Security

Radboud University and Eindhoven University of Technology

My thesis was about [tracking users in mobile network traffic](#).

The courses were about cryptography, security in software, testing techniques, web security, network security, tracking, privacy, security in organizations and tech laws (such as the GDPR).

2017-2024

Bachelor Computer Science – Leiden University

2012-2017

Minor Internet Law – Leiden University

This was part of my bachelors. The courses were about an introduction to law, public law, European law, telecommunication laws, privacy laws, Dutch cyber crime laws and other laws applicable to the internet.

2014-2015

VOLUNTEER EXPERIENCE

Nov. 2016 **Guest speaker - Leiden University**
At “De Avond van Cleveringa”. I gave a lecture to people with a non-technical background about hacking, recognizing the subtle distinctions between malicious and ethical hackers and why we need ethical hackers.

Feb. 2017 **Guest speaker - Atheneum College Hageveld**
I was invited to teach high school students about hacking during several computer science classes.

Aug. 2014 (1 week) **Mentor – El Cid Leiden**
Mentor for a group of first year students during their introduction period. Tasks: entertain the students, keep the group together, make sure they arrive on time at each activity, show them the student life and make sure everyone is having fun and is feeling included.
